D) Woodland : High Government land / hillocks may be marked as woodland class wherever possible.

E) All Government land : Government Land should have no class (SRENI NAI) but it may be marked in the remark column in the Chitha in accordance to the land use.

F) Institutional / Pratisthan : This class shall cover diverse classes of institutions.

Definition regarding for Classification of land :

Trade Site –I: Land along the main road passing through the main trade Centre of the town if has not fall under industrial site, will be classified as Trade Site-I for whatever purpose the land is used. While determining the area of concentration of the trade Centre the factors like existence of communication and transport systems, and other urban facilities should be taken into account.

Trade Site-II: The important trade sites of the town located comparatively away from main trade areas (Trade Site –I) will be classed as Trade site II Lands located along the first bye lane/subway of the main feeder road used for trading purposes may be classified as Trade site-II. Usually in these areas, the volume of trading is lesser than that of Trade Site- I.

Trade Site –III: Land along the main road passing through the main trade Centre of the Revenue town and rural if has not fall under industrial site, and in Municipal Towns, lands located further away from Trade Site-II may be classified as Trade site –III. Usually in these areas, the volume of trading is lesser than that of the trade site-II.

Trade Site –IV: Land located comparatively away from main trade areas Centre of the Revenue town and rural if has not fall under industrial site, and in Municipal Towns, lands located further away from Trade Site-III may be classified as Trade site –IV. Usually in these areas, the volume of trading is lesser than that of the trade site-III.

While taking up the classification of Residential Sites in town areas, apart from degree of development effected to the land, the most important factor that should be taken into account is degree of locational advantages accrued to each category of land.

Residential Site-I : Class of lands is formed taking into account of the lands used for residential purposes located in the important areas of the town particularly near the important roads and Trade site II. The location of these areas is such that all types of urban advantages accrued to it. These classes of land usually cover old and established residential houses.

Residential Site-II : Land used for residential purpose in town near the Trade Site-III, and away from Residential Site-I may be classified as Residential Site –II. These sites are comparatively new growth than the Residential Site-I.

Residential Site-III : Land in town further away from the Residential site-I and located in an area with larger concentration of residential houses, not too far from the Trade Site-III, classes of lands and in prime location of rural area having good connectivity or in sub-urban area may be classified as Residential Site-III. These classes of lands are only newly developed for using it for residential purposes.

Residential Site-IV : Land in town further away from the Residential site-III and located in an area with larger concentration of residential houses, not too far from the Trade Site-IV, classes of lands or rural areas not having good connectivity may be classified as Residential Site-IV.

The Revenue & DM Department shall exercise the authority to further optimize the land classes / Sub-classes as per emerging usage trends.

This Notification comes into force with immediate effect.

I/271383/2023

This is issued with the approval of the Hon'ble Cabinet in its meeting held on 02/08/2023.
