চাহ তলি (SAH TALI)

In the left section with the 'tick' mark represents, those are default mapping and one can not modify or perform any action on those classes.

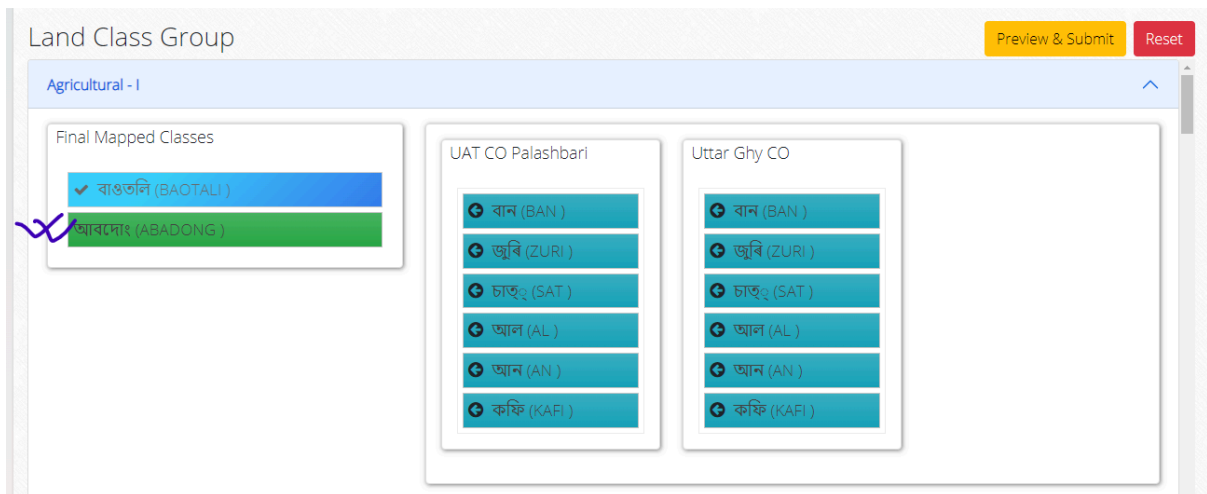

In the right section, list of classes which are mapped by different CO. CO wise list will be here. This list will appear once CO freezes their mapping.

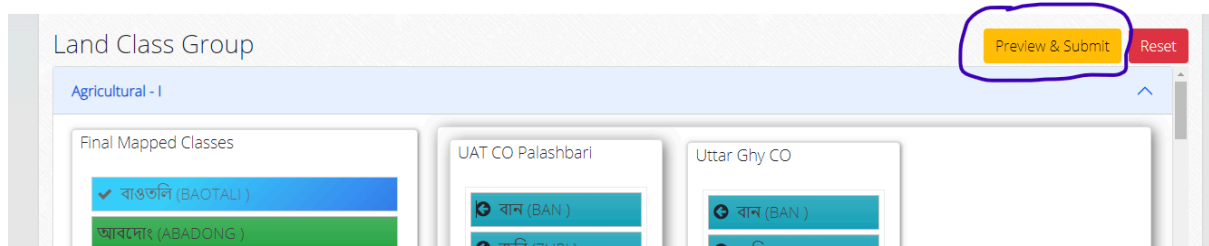

You will have to click on the left arrow, which is in the circle (Marked in the screenshot). Then the system will show that class has been chosen by which CO and under which group. On confirming from there it will come in the left hand side panel.

On clicking on confirm

After placing all classes into “Final mapped classes” DC has to click on the “Preview & Submit” button.

Then you will have the final preview. From there you have to put a code (marked in yellow in the below screenshot) and hit the submit button.
